

# OHIO

The Healthcare Openness and Access Project (HOAP) measures how open and accessible each state's healthcare system is to patient and provider preferences. The overall HOAP index is the average of 10 categories below, referred to as subindexes in the study, each of which is in turn an average of multiple indicators.

The HOAP index ranks Ohio near the middle of the 51 jurisdictions analyzed. Some of the state's highest scores are in the Public Health Subindex and the Taxation Subindex and some of its lowest are in the Provider Regulation Subindex and the Telemedicine Subindex. Ohio's score and rank in each subindex are given below.
